

CHANGING QUALITY OF SERVICE FOR VOICE OVER IP CALLS

ABSTRACT OF THE DISCLOSURE

Methods and/or systems for changing the quality of service (QoS) and/or type of service for voice over IP communications. A system for changing quality of service for voice over IP communications includes a signal monitoring module for monitoring subscriber inputs representing requests for a QoS change; and a controller for implementing subscriber inputs representing requests for a QoS change. A method for changing the quality of service (QoS) during an ongoing voice over IP communication is featured.

5

10 A subscriber line is monitored for a subscriber originated request for a change in QoS. When a request is received, QoS of a subscriber communication is converted utilizing codec algorithms.
